PROGRAM

PRESIDENT'S WORD

Khadija AMINE
President of the SMPI

Dear colleagues

The Moroccan Society of Periodontology and Implantology is organizing its 5th international congress in Marrakech from 13-15 January 2023 to provide a platform for exchange between the various players in the periodontology field.

The scientific committee of the SMPI has selected "the new approaches in periodontology and implantology" for this year's edition, a topic that will showcase the therapeutic innovations in this field.

A rich and varied program has been drawn up. Imminent speakers will discuss everyday issues and share solutions that will help us improve our clinical practice.

Thus, peri-implantitis will be treated by several leading practitioners.

The pioneers of periodontal plastic surgery techniques will lead a session on mucogingival surgery, while the "CAF" will face the "Tunnel Technique" in exciting duels to the delight of the fans of the discipline.

The implantology will also have its share in the program, as a wide range of experts will share their clinical experiences with us.

To put into practice the knowledge acquired during the conference days, various workshops will be offered. Speakers will be dedicated to clarifying any unclear areas and satisfying our curiosity.

The scientific program will be enriched this year and for the first time, by a "live surgery" session. Prof. Dr. Massimo De Sanctis will do us the honor of performing a live periodontal plastic surgery procedure.

The congress will take place in the imperial city of Marrakech, to enjoy the city's beautiful gardens and centuries old medina.

The SMPI family looks forward to welcoming their members and friends to celebrate periodontology once again. The success of this event relies on your presence. Come along to join us in this feast of Periodontology and Implantology.

Great appreciation for all our speakers, who have kindly agreed to participate in this event. Thanks are also extended to our partners and all the members of the Bureau.

Khadija Amine

Friday, January 13

08h00 - 09h00 | Welcoming the participants

☑ 09h00 – 10h45

Peri-implantitis session

09h00 - 09h15 | Presentation of the Theme

09h15 - 10h00 | Peri-implant Diseases and Conditions: Current Classification and Case Definitions **J. ALBANDAR**

10h00 - 10h45 | Periodontal treatment versus dental extraction and implant in patients with severe periodontitis **A. BOUZIANE**

10h45 - 11h15 : Coffee break

☑ 11h15 – 13h15

11h15 - 12h00 | Peri implant disease: where are we now? **N. LANG**

12h00 - 12h45 | Peri-implantitis: Is it possible to prevent? **A. M. ROOS-JANSÅKER**

12h45 – 13h15 | Discussion

13h15 - 15h00 : Lunch break

☑ 15h00 – 16h45

Muco-gingivale session

15h00 – 15h15 | Presentation of the Theme

15h15 – 16h00 | Gingival recession therapy in the lower mandible - criteria of success, treatment strategies and clinical action **S. ABRAHA**

16h00 – 16h45 | Key points and décision-tree in perioplastic surgery **B. CORTASSE**

16h45 - 17h30 : Coffee break

☑ 17h30 – 18h45

17h30 – 18h15 | Biological and clinical aspects in utilizing connective tissue graft in esthetic mucogingival surgery **M. DE SANCTIS**

18h15 – 18h45 | Discussion

Saturday, January 14

08h00 - 09h00 | Welcoming the participants

08h45 – 10h30 : Live surgery session

M. DE SANCTIS

10h30 – 11h00 : Coffee break

✔ **11h00 – 13h00**

Implant in esthetic zone session

11h00 - 11h15 | Presentation of the Theme

11h15 - 12h00 | Towards digital management of the the esthetic zone **O. MIKOU**

12h00 - 12h45 | Immediate implants in the esthetic zone : what should we know **N. HAJOUJ**

12h45 - 13h00 | Discussion

✔ **13h00 – 14h30**

Sponsors session

13h00 - 14h30 | Osseodensification, optimise the site optimise the outcome

N. BENNANI - Y. LAALOU

✔ **15h00 – 16h45**

Complex case session between aesthetics and compromise session

15h00 - 15h15 | Presentation of the Theme

15h15 – 16h00 | Current potential of reconstructive periodontal surgery: established concepts and new ideas **S. ASLAN**

16h00 - 16h45 | Periodontal regeneration in complex cases **F. GRAZIANI**

16h45 - 17h15 : Pause café

✔ **17h15 – 18h15**

17h15 - 18h00 | Digital clone technique: maximizing tissue growth around the implant **J. L. ZADIKIAN**

18h00 - 18h 15 | Discussion

18h15 : Closing Ceremony

20h00 : Gala Dinner

Sunday, January 15

09h00 – 13h00 : Workshops

Dental Project

Application du laser diode en médecine dentaire

S. HAITAMI

Salle 1

Identex

Osseodensification: optimize the site-optimize the outcome

N. BENNANI - Y. LAALOU

Salle 2
