European Federation  
of Periodontology

*WE ARE A EUROPEAN FEDERATION  
WITH A GLOBAL REACH:*

## EFP

# 44

member societies

# 18,000 +

periodontists and other  
oral-health professionals

Founded in

# 1991

# 24

accredited-programmes

## Meet the EFP

- Global benchmark in oral health, gum health and prevention of gum diseases
- Global benchmark for clinical guidelines
- Raises awareness of the importance of gum health
- We foster global research that links periodontal health to systemic diseases such as cardiovascular disease, diabetes, and others

## Special publications

The EFP has commissioned two white papers from the Economist Intelligence Unit and Economist Impact on the socioeconomic impact of periodontitis and on addressing inequalities in oral health.

- Time to take gum disease seriously
- The burden of caries and periodontitis
  - These white papers illustrate the importance of prevention through innovative economic models
  - Economic data, figures and statistics are key to convincing policymakers, key stakeholders to advance healthcare

## What is EuroPerio?

- The world's leading congress in periodontology and implant dentistry
- Organised every three years by the EFP
- A global platform for science, clinical innovation, public health, and professional exchange

## Empowering the next Generation of Periodontists

At EuroPerio11, we proudly welcome a new wave of young professionals. This year, **38% of attendees are under 35**, many joining for the first time. At EuroPerio10, 35% of participants were also under 35, and recent Perio Master Clinic events have seen strong turnout from younger professionals. Aligned with the EFP's strategic plan, we are committed to engaging these emerging talents through structured opportunities for scientific exchange, networking, and recognition. Initiatives such as the EFP Digital Innovation Award, the Jaccard Prize, the Graduate Research Prize and the Student Symposium reflect our dedication to nurturing innovation and ensuring the continuity and global impact of periodontology.

## Key facts and figures

- **Location:** Messe Wien, Vienna, Austria
- **Dates:** 14–17 May 2025
- **10,000+** participants from over **100 countries** expected
- **150+** top international speakers
- Almost **1,400** scientific posters
- **Industry exhibition** featuring cutting-edge tech and tools
- **A global platform** for science, clinical innovation, public health, and professional exchange
- **Live surgeries and hands-on workshops**
- **Vibrant social and networking events**

## Programme highlights

The EuroPerio11 scientific programme covers every major aspect of periodontal and implant dentistry, combining clinical excellence with scientific depth and practical innovation:

- New insights into the pathobiology of periodontitis
- The perio-systemic connection, including unexplored areas
- Nutrition and gum disease: how lifestyle influences periodontal health
- Latest in tissue regeneration and biomaterials
- Novelty in implant procedures and bone regeneration

## Key sessions include

- Artificial Intelligence in dentistry: practical and ethical implications
- Personalising periodontal treatment through precision approaches
- Innovation in periodontal surgery: next-generation techniques
- Women’s Oral Health: addressing specific clinical and societal challenges
- Non-surgical therapy for peri-implantitis: evolving strategies
- Joint EFP–AAP session on gut microbiome research and its relevance to periodontitis
- Live and hands-on learning
- Three live surgeries with top clinicians demonstrating cutting-edge procedures
- “Navigating clinical crises” sessions in:
  - Bone regeneration and implant therapy
  - Mucogingival therapy
- Complex peri-implant cases
- Patient-centred and interdisciplinary sessions

## Tracks cover key areas

- Clinical issues: periodontitis, implant dentistry, peri-implantitis, mucogingival surgery, interdisciplinary care
- Treatment stages: diagnosis, prevention, therapy, regeneration

There is content relevant to different professionals: dentists, periodontists, dental hygienists, oral surgeons, prosthodontists, orthodontists, dental nurses, or medical doctors.

## Vibrant social programme including

- Charity run
- Welcome reception
- Official congress party
