# SPEAKERS

## Andreas Stavropoulos

Andreas Stavropoulos (AS) after having studied dentistry in Heidelberg, Germany, and Thessaloniki and Athens, Greece, he worked a few years in private practice limited to periodontics and implant dentistry. AS joined then the dept. of Periodontology, Aarhus University, Denmark, for postgraduate training, where he also received his Ph.D. in 2002 and his dr.odont. degree in 2011, based on preclinical and clinical studies on regenerative periodontal therapy and in association with dental implants. In 2013, AS joined Malmö University as the Professor and Chair in the dept. of Periodontology.

AS has received several awards for his research, including the 1st Basic Research Prize of the European Association of Osseointegration (2011) and the Straumann Award in Regenerative Periodontal Medicine, conferred by the IADR (2013). He has authored several publications in international peer-reviewed journals and book chapters, and he is member of the Editorial Board in several dental journals, including the Journal of Clinical Periodontology and Clinical Oral Implants Research. AS is currently Elected Member of the Executive Committee of the European Federation Periodontology, Member of the Scientific Affairs Committee of the EFP, Member of the Education Committee of the EAO, and the Chancellor of the Periodontal Research Group of IADR.

## Kristina Bertl

After graduating in dentistry at the Medical University of Vienna (MUV; 2010), Kristina Bertl (KB) continued with a postgraduate education (MSc in Periodontology; 2012), achieved her PhD degree (2015) and docent status (2014), completed a MBA degree in Healthcare Management (2018), and published so far more than 55 papers in international journals. KB was working clinically at the MUV in the Dept. of Periodontology (2010-2012) and Dept. of Oral Surgery (2012-2014). In 2014 KB moved to the Dept. of Periodontology at Malmö University (SWE). Since 2014, KB is the representative for the ÖGP Youngsters, since 2016 board member of the Austrian Society of Periodontology (ÖGP), and from 2017-2019 junior officer of the EFP's Scientific Affairs Committee.

### Registration fees

HSP Members & Students: **70 €**

Non Members: **90 €**

Meet the experts session  
(limited to 20 participants) No extra  
cost

# PROGRAM

**Saturday, 10 April 2021**

---

09.15 – 09.30 Opening remarks

*Moderator:* **Charalampos Kalaitzakis**, President of HSP

09:30 – 10:15 **Peri-implantitis: Biological background and treatment concept. Why is it as it is, and how do we deal with it?**

This part provides basic clinically relevant information on the etiology, pathogenesis, and the challenges, and proposes a treatment concept.

10:15 – 11:00 **Non-surgical and surgical therapy – part I**

**To cut or not to cut? And if to cut, how do we do it? Part I**

This part presents the various steps of treatment, richly illustrated with clinical videos. From resective to regenerative and the combinations.

---

11:00 – 11:15 **Break**

*Moderator:* **William Papaioannou**, Secretary General of HSP

11:15 – 12:00 **Non-surgical and surgical therapy - part II**

**To cut or not to cut? And if to cut, how do we do it? Part II**

This part presents the various steps of treatment, richly illustrated with clinical videos. From resective to regenerative and the combinations.

12:00 – 12:45 **Soft-tissue management: what, how, and when?**

The need of soft tissue management and what, how, and when to do is explained, including clinical videos.

12:45 – 13:15 Discussion

---

13:15 – 13:30 **Break**

*Moderator:* Professor **Lazaros Tsalikis**, Vice President HSP

13.30 – 15.00 **Meet the expert session**

A live and interactive 90 min discussion with the experts, analysing representative clinical cases of peri-implantitis. The opportunity will be given to fully analyse specific surgical solutions and techniques, which will also be demonstrated with videos and close-up pictures originating from a high number of clinical cases. Availability of this session is reserved for only a limited number of 20 participants and given on a first come first served basis, with no additional cost.

*Learning outcomes:*

Be aware of various factors of importance during treatment planning of peri-implantitis cases.

Be aware of the impact of defect morphology and implant surface in the choice of treatment.

Be able to recognize the appropriate approach (resective, regenerative, or combination) for each specific case.
