

CONTINUING EDUCATION COURSE

for Dental Hygienists and Undergraduate DH Students

THE USE OF NEW TECHNOLOGIES IN PERIODONTAL AND IMPLANT SUPPORT THERAPY

Bologna (I) ▪ 12-13 May 2023
Palazzo della Cultura e dei Congressi

Coordinators: **Giulia Maria Mariani / Francesco Oreglia**

Speakers: **Maria Clotilde Carra / Giacomo Gualini / Serena Leuci / Giorgio Pagni /**

Mario Rocuzzo / Simone Roatti / Silvia Sabatini / Serena Vaghi

Dear Hygienist Members and Friends,

The last International Congress in RIMINI addressed the concept of invasiveness in periodontology and implantology, and evaluated how the new technology and evolution of clinical protocols can play a primary role in the appropriate diagnosis, prognosis and treatment of periodontitis and peri-implant diseases.

The objective of this SIdP continuing education course is to gain insight in the therapeutic field, and examine the role of technological innovations in periodontology and implantology, providing hygienists with criteria needed to distinguish between information based on scientific evidence, "suggestions" based on a clinical case or information based on clinical reports exclusively driven by commercial interests.

With our member Friends of the Cultural Committee, we have designed a Course for Dental Hygienists and Dental Hygiene Students based on the same topics and methods as the course for Dentists. The subject on supportive periodontal therapy is divided into two specific sessions: The first is aimed at the patient treated for severe periodontitis and restored with implant-prosthetic therapy, and the second is dedicated to the recurrence of periodontal disease and the concrete possibilities of non-surgical treatment. The Coordinators of the 2 sessions will work actively with the speakers in order to take a deeper look at the topics and describe step by step the different clinical procedures just as it is done in the Dental course.

Each session is coordinated by an Active Member who is an expert in the specific topic and will interact in a dynamic way with the Participants, Dentists and Hygienist Guests Speakers. Based on the SIdP tradition the Course will illustrate "step by step" techniques whose rationale and effectiveness are based on the scientific evidence. The photos, teaching diagrams and videos showed will serve as a guide for each participant for use in the daily practice.

I am confident that this Course will represent a great opportunity for professional development and growth for our Members and will also help increase the "ethical conscience" that underlines our behaviour in the daily clinical activity with respect to our patients and in accordance with the SIdP motto for the two-year period 2022-23: **Ethics in Perio & Impla.**

While thanking the Coordinators and Speakers for their expertise and professionalism, I welcome you to Bologna in large numbers, to attend this scientific event in which we will share not only cultural and professional growth, but also moments of conviviality and authentic friendship

I'm looking forward to seeing you in Bologna in your, our,

SIdP Family!

Nicola M. Sforza
